KNOWLEDGE MADE USEFUL

The Royal Society of Edinburgh work in partnership with various universities around Scotland to organise a set of Science and Technology Masterclasses to conduct science experiments with S1 and S2 students.

The sessions are intended to give young people who have shown an interest in science and technology the opportunity to broaden their knowledge and experience. The sessions promote participation and provide the students with a unique insight into academic life and research. At these Masterclasses, students get up to all sorts of science and technology mischief!
