

Banchory Academy

My S3 Profile

Name:

Class:

My Profile will tell you about my achievements, the progress I have made as a learner and how I have used my developing skills.

Date:

Learner Statement

I am a very level headed person. I have a good sense of humour and I am hard working. My attendance at school is very good. I don't like being absent. My punctuality is very good. I am very rarely late. I am very determined to win when playing football. I am always organised and always have the right equipment. I am a determined person who wants to do well at school and in life. I get on with my work straight away.

I have good communication skills which I use in every subject whether it's presenting a PowerPoint or written report, talking to teachers or peers, drawing diagrams or illustrations for creative tasks. I am good at working in a team. I know this because in group tasks my group would always be organised and know what to do. I get on well with other people.

I take part in Inter-House activities to support my House.

My Achievements – In and out of school.

In School :

Play for school football team. Several Praise Postcards. Good test results in Maths. Attend Science club every week. Took part in Inter-House in S1/S2. Took part in Anti Bullying poster competition.

Out of School :

Play for Banchory Boys Football Club. Winner of school 100m. Attend Scouts every week. Help walk my dog every night

CURRICULAR AREA	LEARNING AND PROGRESS	CURRICULAR AREA	LEARNING AND PROGRESS
Literacy / English	<p>I use my literacy skills every day and in every class. I find it easy to communicate with others using writing, speech and the internet. I can use PowerPoint as well.</p> <p>In English I work well with other people. I am doing well because the activities we do are fun. When analysing Edward Scissorhands the best bit was watching the film and now I know how the author creates setting and atmosphere.</p> <p>My writing and reading skills are good and I can talk confidently about things I understand. I can take part in a controlled debate. My teacher gives me positive comments on my essays and this has helped me improve my critical essay writing. I was very proud of the latest essay I did.</p>	Numeracy / Maths	<p>I can use graphs in Geography. Calculations in Physics come easily to me. This is a strength I have been working hard in Maths and have developed a lot of new skills. I learn new concepts quickly and recently got good results in a big assessment.</p> <p>In S1 I was not so confident in Maths but this improved in S2 and now I look forward to Maths. I particularly enjoy working with equations. I feel I have improved a lot through assessing a partner's work. This helps me with my own progress.</p>
Health & Wellbeing	<p>I am a very healthy person. I exercise three times a week and eat healthy foods. My fitness is important to me.</p> <p>Sport is my main interest and I love playing football. By taking PE I have learned how a lot of sports work. I can use my skills in hockey, football, volleyball and basketball very well. I am not so confident in badminton and swimming.</p>	Science	<p>I am aware of my limits in Science. I am studying Physics and Chemistry. In S1 I didn't enjoy Biology. I enjoy Physics best. I enjoy practical lessons and I work well with other people. I can understand the different concepts and always keep concentrated when writing down important information from the board. Measuring sound travel meant I had to listen hard and communicate using walkie talkies.</p> <p>This experiment helped my understanding in science and maths at the same time. I want to carry on with science in S4.</p>
P.E		Chemistry	

CURRICULAR AREA	LEARNING AND PROGRESS	CURRICULAR AREA	LEARNING AND PROGRESS
H.E	The cooking side of HE was good and I managed to take home some interesting dishes	Physics	
S.E	In PSE I have gained a lot of confidence in being able to talk to others and listen to their views. My knowledge of first aid is now quite good	Biology	
French	I started French in P6 and generally I have enjoyed the subject. I prefer reading French as opposed to speaking French. I have managed to memorise words and meanings. If we go to holiday in France I think I would be able to use these skills well.		

CURRICULAR AREA	LEARNING AND PROGRESS	CURRICULAR AREA	LEARNING AND PROGRESS
Social Studies	I enjoy Geography best. I am able to record information in many different ways : graphs, presentations etc. I understand how to treat people in other countries and how to take opinions into consideration.	Expressive Arts	Drama and Art were quite interesting and allowed me to be creative but my strenghts certainly are in Art.
Geography		Art	
History	History and Modern Studies were ok but I didn't get excited by anything in these Subjects	Drama	
Modern Studies		Music	I really enjoy Music. I was really proud of composing a piece of music with two other students. I had to work as a member of a group and was able to put forward my views. The final piece was great fun. Playing the piano is something I would really like to do.
RME	In RME I have learned how to treat others with respect and to act responsibly myself. I can take other peoples' views into consideration when talking about religion	Technologies	I enjoy the practical side in D & T. I have developed my skills and can now use woodworking tools very well and with confidence. My design project is getting near completion and should look good even if I say so myself.
		Graph Comm	
Business	Business and Computing allowed me to use my IT skills which I did enjoy. I find it easy to use computers for research and making notes	Product Design	
Management			
Administration
